

Learning Sounds, Reading & Spelling in American English are

Interactive, Internet Instruction™

English Alphabet & Sounds instruction™ (EASi™) introduces the 46 phonemes (speech sounds) in isolation and in text and teaches anyone these unique sounds that the letters and letter combinations of the English language can make. It is designed for beginning readers, English Language Learners, Limited English Proficient and English as a Foreign Language students.

Phonics interactive Education™ (PiE™) is a highly-effective and unique learning system for beginning, remedial and intervention reading and spelling programs. PiE is a systematic and explicit phonics program, based on Orton-Gillingham principles, and is modeled after the Congressionally-commissioned National Reading Panel report on how best to effectively teach reading skills to people of any age.

Used together, these two multi-sensory computer-based learning systems can teach virtually anyone to speak, read and spell. For remedial and intervention learning, students should gain one or more grade levels in as little as 30 hours of instruction.

The above programs, coupled with the Bright Sky Learning™ *Comprehension And Reading Enrichment™* (CARE) program will not only raise student achievement, but also increase their confidence, self-esteem and cognitive thinking abilities.
